The image shows a screenshot of a GNU Emacs editor window. The title bar at the top reads "lab07.sh - GNU Emacs at dk5n53". Below the title bar is a menu bar with the following items: "File", "Edit", "Options", "Buffers", "Tools", "Sh-Script", and "Help". The main editing area contains a shell script with the following content:

```
#!/bin/bash
HELL=Hello
function hello {
    LOCAL HELLO=World
    echo $HELLO
}
echo $HELLO
hello
```

The script defines a variable `HELL` with the value `Hello`, a function `hello` that takes a local variable `HELLO` with the value `World` and prints it, and then calls the function `hello` after printing the value of `HELL`.

File Edit Options Buffers Tools Sh-Script Help

```
#!/bin/bash
HELL=Hello
function hello {
    LOCAL HELLO=World
    echo $HELLO
}
echo $HELLO
hello
function hello {
    LOCAL HELLO=World
    echo $HELLO
```
